Hiring Manager

Firestal, LLC

Dear Hiring Manager,

I am writing to express my interest in the Junior Software Engineer Internship position at Firestal, LLC. I am currently pursuing a Bachelor of Science in Computer Science at the New Jersey Institute of Technology and have hands-on experience building full-stack web applications using JavaScript, TypeScript, React, Node.js, and SQL databases.

Through my academic and project work, I have developed and deployed production-style applications incorporating RESTful APIs, user authentication, database design, and cloud infrastructure on AWS. I have experience debugging application logic, optimizing performance, and collaborating with team members using Git-based workflows. These experiences have strengthened my understanding of clean code practices, scalable application design, and modern deployment processes.

I am particularly interested in this opportunity because it emphasizes real-world application development and collaboration with experienced engineers. I am eager to contribute meaningfully to Firestal's projects while continuing to grow as a software engineer in a professional, remote environment.

Thank you for your time and consideration. I would welcome the opportunity to further discuss how my skills and experience can support your team.

Sincerely,

Sandeep Adhikari
