

Sandeep Adhikari

Bloomfield, NJ

+1 (973) 216-8107 | sa2734@njit.edu | <https://www.sandeepadhikari.com/>

SUMMARY

Software developer with experience in full-stack systems and AI-assisted development workflows. Skilled in guiding large language models for code generation, debugging, and structured evaluation. Focused on improving software reliability and development efficiency through AI-driven engineering practices.

EDUCATION

New Jersey Institute of Technology, Newark, NJ

B.S. in Computer Science

Relevant Coursework:

Advanced Database Systems, Introduction to AI, Introduction to Generative AI, Operating Systems, Intensive Programming in Linux, Computer Networks, Cybersecurity

WORK EXPERIENCE

Handshake AI

AI Evaluation Contributor

Remote | April 2026 – Present

- Designed structured evaluation tasks for LLM-based coding agents
- Authored milestone-driven task specifications with strict continuation criteria and failure conditions
- Evaluated multi-turn model trajectories to identify reasoning failures and incorrect code behavior
- Developed binary grading rubrics aligned with observable agent outputs
- Guided AI models through iterative debugging and refinement in JavaScript and Python environments
- Ensured evaluation quality by designing tasks where at least one model fails and one succeeds

TECHNICAL PROJECTS

Merck DOCX Comparison Engine — Capstone Project

New Jersey Institute of Technology | 2026

GitHub: <https://github.com/DmchedNGold/Merck-Documents-Comparison>

- Built a document comparison engine that generates Word-compatible Track Changes (w:ins, w:del) directly in .docx XML
- Implemented token-based diffing and paragraph alignment using LCS (Longest Common Subsequence)
- Designed pipeline for parsing, aligning, and emitting structured document revisions across paragraphs and tables
- Debugged edge cases including TOC formatting issues, whitespace merging, and multi-token replacements
- Improved diff accuracy by refining tokenization, alignment heuristics, and revision emission logic
- Processed .docx files at the XML level using Python standard libraries (zipfile, xml.etree.ElementTree)

StyGo — Full-Stack Application (AWS-Deployed):

GitHub Frontend: https://github.com/SandeepAdhikari/Stygo_App

GitHub Backend: <https://github.com/F25-CS490-Group6/CS-490-GP-Backend>

- Developed full-stack web application using React, Node.js, Express, and PostgreSQL.
- Built RESTful APIs to support user authentication, data management, and business workflows.
- Collaborated with a team of developers using Git and GitHub workflows.
- Debugged and optimized backend queries to improve application performance.
- Deployed and maintained cloud infrastructure on AWS (EC2, RDS).
- Participated in code reviews and iterative feature development.

DevPilot-HQ — AI-Powered Developer Onboarding CLI

GitHub: <https://github.com/SandeepAdhikari/DevPilot-HQ>

- Designed and developed a modular CLI application using structured, object-oriented design principles.
- Implemented input validation and error handling to ensure reliable execution.
- Conducted testing and debugging to improve performance and correctness.
- Documented functionality and usage for end users and maintainers.

Fortran95 — Compiler | C++ Compilers | Programming Languages | Recursive-Descent Parsing

- Developed a full interpreter in C++ including lexical analysis, recursive-descent parsing, and execution engine.
- Implemented structured error handling and runtime validation to detect and resolve syntax and semantic defects.
- Designed symbol tables and memory management logic to simulate program execution.
- Created systematic test cases to validate compiler correctness and edge-case behavior.
- Produced clear documentation and line-numbered diagnostics to improve maintainability and debugging efficiency.

KEY SKILLS

Language: JavaScript, TypeScript, Python, C++, C

Frontend: React, Next.js

Backend: Node.js, Express, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Cloud & Tools: AWS (EC2, RDS), Git, GitHub, CI/CD

AI & Tooling: LLM workflows, prompt design, debugging AI-generated code, structured evaluation

CERTIFICATIONS

- C Programming Masterclass: Pointers & Advanced C (<https://www.udemy.com/certificate/UC-65d9428f-ad12-4e66b4b99ccc8737fff9/>)
- Linux Bash Shell Scripting: Complete Guide incl. AWK & SED (<https://www.udemy.com/certificate/UC-26c31935f376-428c9039-fc03b92a2148/>)
- Networking Basics – Cisco (<https://www.credly.com/badges/0ce76c5e-5e30-4f3f-8138-162fc509b4c2/>)
